

Sustainability Climate change

Governance: Sustainability policy – climate change

....

Climate Change and Circular Economy

Commitment to combating climate change and promoting the circular economy by reducing greenhouse gas emissions by controlling emissions from its three scopes and monitoring a decarbonisation plan efficient use of energy and fuels, promoting the use of renewable energy.

the rational and efficient use of natural resources and the responsible design of products and processes, promoting the circular economy (use of recycled materials, efficient transport, waste recovery, etc.) throughout the value chain.

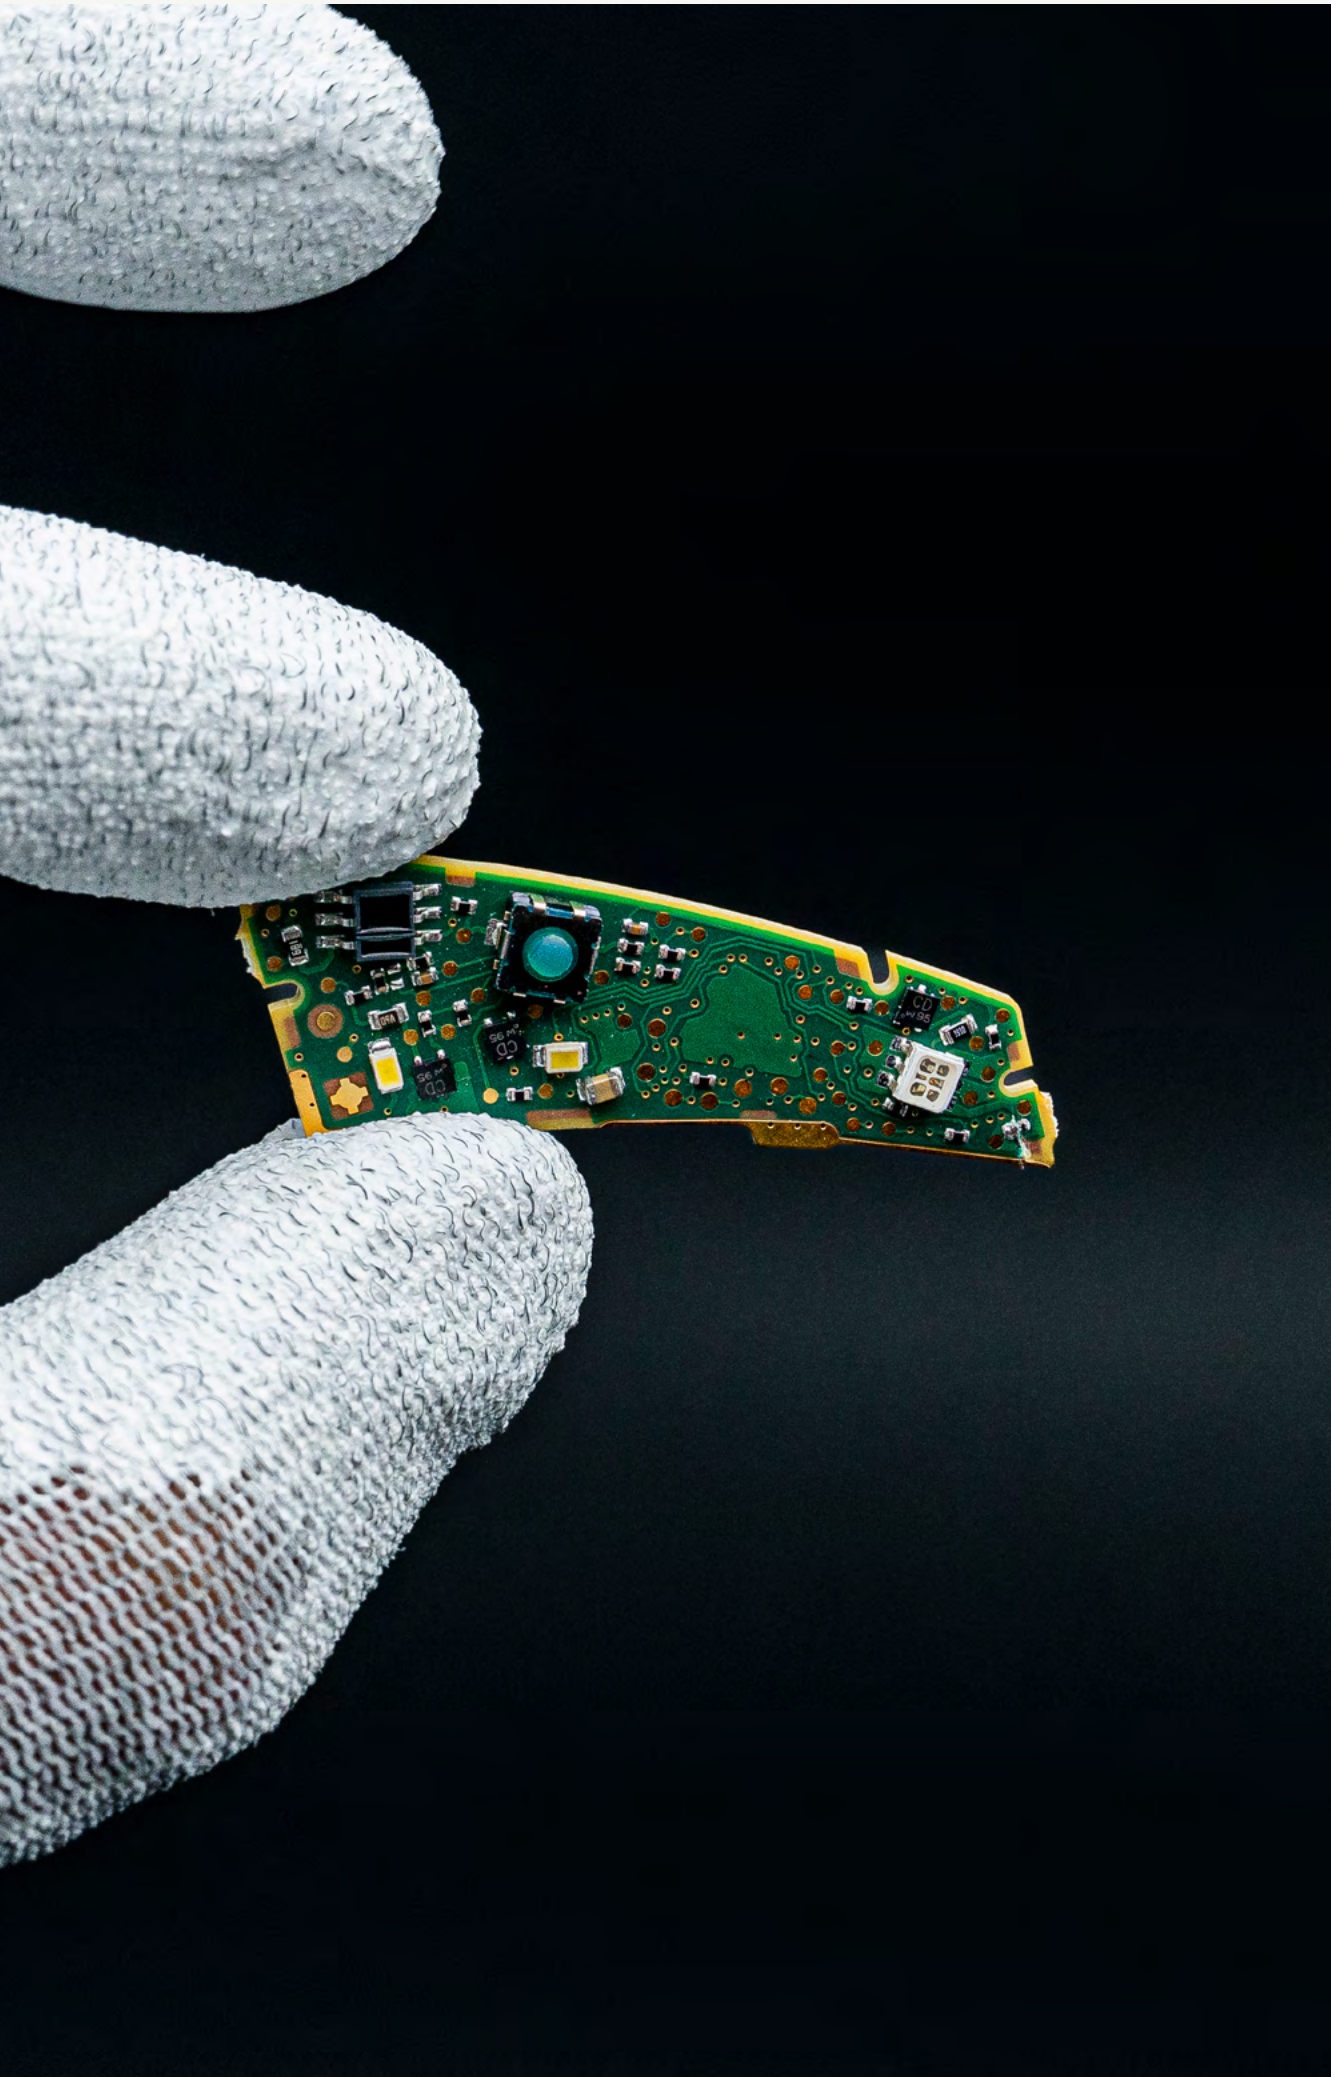

.....

Management – Sustainability Committee

The Sustainability Committee manages the Sustainability Plan, which sets out the strategic challenges defined by the organisation and the actions established to achieve them. These include:

Project: Climate impact reduction:

Reduction of greenhouse gas (GHG) emissions through the implementation of the decarbonisation plan.

Project milestones: Climate impact reduction

Annual calculation of the organisational carbon footprint

Decarbonisation plan aligned with the Paris Agreements and with the goal of limiting global warming to 1.5°C. Our commitment is:

Reduction of scopes 1 and 2 of our 2022 organisational carbon footprint by 50% (in line with the targets set by the SBTi).

Annual reporting on the CDP (Carbon Disclosure Project) platform (Carbon Disclosure Project) .

2024 climate rating: B

Approved by the Governing Board of Fagor Electrónica S. Coop.
